PROFESSIONAL SUMMARY

Software engineer and former **Placement Mentor** with 3+ years of technology experience who turns complex topics into clear, usable learning. Has mentored and guided learners as a Placement Mentor and informally mentored 2 interns, works with subject-matter experts and business stakeholders to gather and validate requirements, and writes technical documentation for non-technical audiences. Builds accessible (WCAG 2.1) interfaces in **HTML5, CSS3, JavaScript and TypeScript** and has integrated **LLM APIs (Anthropic Claude, OpenAI GPT)** into working products, including token and cost management. Building foundational knowledge of instructional design models (ADDIE, SAM), adult learning principles, Bloom's taxonomy, microlearning and ML/LLM fundamentals. UAE-based and available immediately.

TECHNICAL SKILLS

Front End & Design Implementation: HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript, React.js, Angular, Storybook, Tailwind CSS, Bootstrap, responsive and cross-browser UI, WCAG 2.1, semantic HTML, ARIA labels

Instructional Design & Learning Content: Foundational knowledge of ADDIE and SAM, learning objectives and Bloom's taxonomy, adult learning principles, microlearning, storyboards, job aids, training manuals, quizzes with feedback and scenario-based learning; plain-language writing

Training & Collaboration: Mentoring and coaching learners, explaining technical topics to non-technical audiences, technical documentation, requirement gathering and validation with stakeholders, reviewing work for accuracy and consistency (code reviews), Agile/Scrum

Office, Design & LMS: Microsoft Word, Excel, PowerPoint and SharePoint; Canva and Figma for layouts and mockups; Learning Management System (LMS) and e-learning authoring concepts (foundational)

Programming Languages: C#, Python, JavaScript, TypeScript, SQL

AI & LLM: Anthropic Claude API, OpenAI GPT API, LLM-powered chatbots and AI-assisted features in Python and TypeScript, API token and cost management; foundational knowledge of prompts, tokens, context windows, training vs inference, RAG vs fine-tuning and human review of AI content

Back End, Data & Tools: C#/ASP.NET MVC, Django, Django REST Framework, Node.js, REST APIs, SQL Server, PostgreSQL, MySQL, Git, GitHub, Docker, Azure, Firebase, Vercel

Testing & Quality: Jest, Django API tests, QA and testing, debugging and root-cause analysis, Lighthouse, Chrome DevTools

PROFESSIONAL EXPERIENCE

Software Developer (Full Stack – Front End and API)

Jun 2024 – Aug 2026

Easy Design Systems Pvt. Ltd., Coimbatore, India
Technologies: React.js, Angular, TypeScript, RxJS, REST APIs, WebSockets, IndexedDB, React Native, C#, ASP.NET MVC, SQL Server, SCSS, Git, Azure

- Informally mentored 2 interns, and worked with backend developers, QA and business stakeholders in an Agile workflow (requirements, code reviews, testing, releases).
- Provided live production and technical support: reproduced issues with client teams, explained causes and fixes, deployed fixes to Azure-hosted sites, and found root causes such as missing base URLs, unpublished builds and cached data.
- Built and maintained core Sales, Finance, Purchase, Accounts, Inventory and Reporting modules of the Titan Enterprise ERP platform (manufacturing and retail e-commerce) used daily by 10,000+ users across India and the Gulf, in a team of 10+.
- Developed reusable Angular components, reactive forms, dynamic tables, filters and validation logic, cutting duplicate UI code and speeding up new feature delivery.
- Built React.js and TypeScript screens and reports for a restaurant ERP product used by 50+ clients, including **Castle IT Solutions, Dubai** (menu management, ordering, booking, cart, item management); added an IndexedDB layer that cut repeated API requests and supported live WebSocket-based features.
- Solved cross-application navigation by building a lightweight Angular app for the Bill of Materials view and deep-linking to it from Item Master with URL-encoded query parameters, without merging the two applications.
- Contributed to the API layer in C#/ASP.NET MVC (new endpoints, controllers, SQL Server stored procedures with CRUD operations) and optimized API calls and data rendering so high-traffic screens stayed responsive.

Web Developer (React.js)
Nov 2023 – Feb 2024

Machenn Innovation, Coimbatore, India
Technologies: React.js, JavaScript, Vite, Firebase, OpenAI GPT API, Stockfish Engine

- Built React.js interfaces and reusable components for a consumer chess gaming and learning platform (AllReal and Sigaram64), developed in association with Grandmaster Surya Ganguly.
- Integrated the OpenAI GPT API to power an in-app AI chatbot (user message, API call, response rendered in the React UI) and added the Stockfish Engine for move analysis.
- Managed API usage and token costs after paid credits drained quickly under heavy use, and evaluated a lower-cost predefined-response alternative.
- Configured Firebase Authentication for secure user access and created responsive layouts for desktop and mobile.

Python Full Stack Developer Intern
Apr 2023 – Oct 2023

Brainery Spot Technology, Coimbatore, India
Technologies: Python, Django, Django REST Framework, MySQL, React/JavaScript, Docker, Jest, HTML, CSS, Bootstrap, Git

- Built and shipped, as the sole developer, a Restaurant Booking System with Django, Django REST Framework and MySQL, handling end-to-end reservation and menu workflows.
- Implemented CRUD operations, REST APIs, database integration and backend business logic; extended the system with a React/JavaScript front end and Docker.
- Practiced Git-based workflows and wrote Jest tests for UI components.

Placement Mentor
Aug 2022 – Oct 2022

Focus 4-D Career Education Pvt. Ltd. (FACE Prep), Coimbatore, India

- Mentored and guided learners on placement and career readiness, giving them practical advice and feedback to improve.
- Explained concepts to learners in simple, easy-to-follow language and supported their preparation for job opportunities.

SELECTED PROJECT

Mini Inventory System with Claude Integration *(React, TypeScript, Django REST Framework, Anthropic Claude API)*

- Built a full-stack inventory application with a Python/Django REST API, a React + TypeScript front end, automated tests and a deployed live demo (Vercel).
- Extended the products page with a Claude API integration for AI-assisted features. GitHub: github.com/Kiruthikaponneswaran/Mini-Inventory

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Electronics and Communication Engineering – University College of Engineering, Dindigul (Anna University), 2018–2022 | CGPA 7.82 / 10.0 (78.2%)

HSC (Class 12), PCMB – 918 / 1200 (76.5%) | **SSLC (Class 10)** – 455 / 500 (91%)

Certifications: Python Full Stack Web Development (Brainery Spot Technology); Python (Basic) (HackerRank)
